

Product Overview

Description

Postal Consultant™ is a software solution that can weigh mail, calculate postal rates and fees, set the amount on the postage machine. Print USPS eDelivery Confirmation and eCertified labels and forms, and much more!

Postal Consultant runs on a PC, providing a fast and efficient way to process daily mail. Its features are easy to use and understand. In no time at all, even a novice will be up and running with Postal Consultant. And its electronic delivery confirmation can provide significant cost savings.

Features

Postal Consultant is available in three configuration levels which contain the following features:

Level I:

- Ability to upload and track confirmation services with the USPS
- Auto increment tracking number option – USPS supplied labels
- Custom splash screen – based on security key type
- Priority and Parcel Post confirmation services using USPS supplied labels
- Printing of confirmation service barcode using Avery® labels
- Basic report capabilities
- Postage meter interface with WJ60 and WJ90 mailing systems, only.
- Access to the most popular USPS Rates
- Special service rating for mail classes
- Interfaces with Hasler's 10 lb. capacity postal scale
- IMM reference data function (International Mail Manual)
- Optional Eltron label printing for USPS confirmation labels

Product Overview

Level 2 includes all features in Level 1 and adds the following:

- 3 tier accounting
- 32 character fields
- Re-nameable accounting fields
- Additional reporting for accounting

Level 3 includes all the features of Level 2 plus:

- eCertified feature – printing of Laser Substrates Certified forms (Laser Substrates Form #LCD 811; call 800-538-4900 to order)
- Full address book with import feature
- Email notification capability – two email addresses per transaction
- Firm Mailer Book (USPS Form 3877) report
- Full address label printing (Avery® or optional Eltron printer)
- Also interfaces with WJ135 or WJ180 mailing systems
