

DURABLE PRODUCTION  
ADDRESSING SYSTEM

ADDRESSING SYSTEMS

**HJPAS**

Optimizing the  
Production  
Mail Environment

**HASLER**  
*America's better choice.®*

## HIGH-SPEED, FULL PRODUCTION CAPABILITY FOR ALL YOUR ADDRESSING NEEDS

Hasler's HJPAS is a production addressing system designed to be your professional mailing solution. It delivers the versatility, performance and durability to maximize output and optimize the efficiency of a production mail environment. The HJPAS provides true expandability, along with seamless integration among the feeder, printer, conveyor, and other peripherals, thereby reducing manpower and operational set-up time.

The HJPAS has the critical performance features that turn your processing function into an efficient and productive addressing center. Its Production Mail Table offers complete centralized controls to simplify operations. Feeders utilize high media hoppers for volume production and reduced feeding time, processing virtually anything, from envelopes and postcards to magazines, newspapers and books.

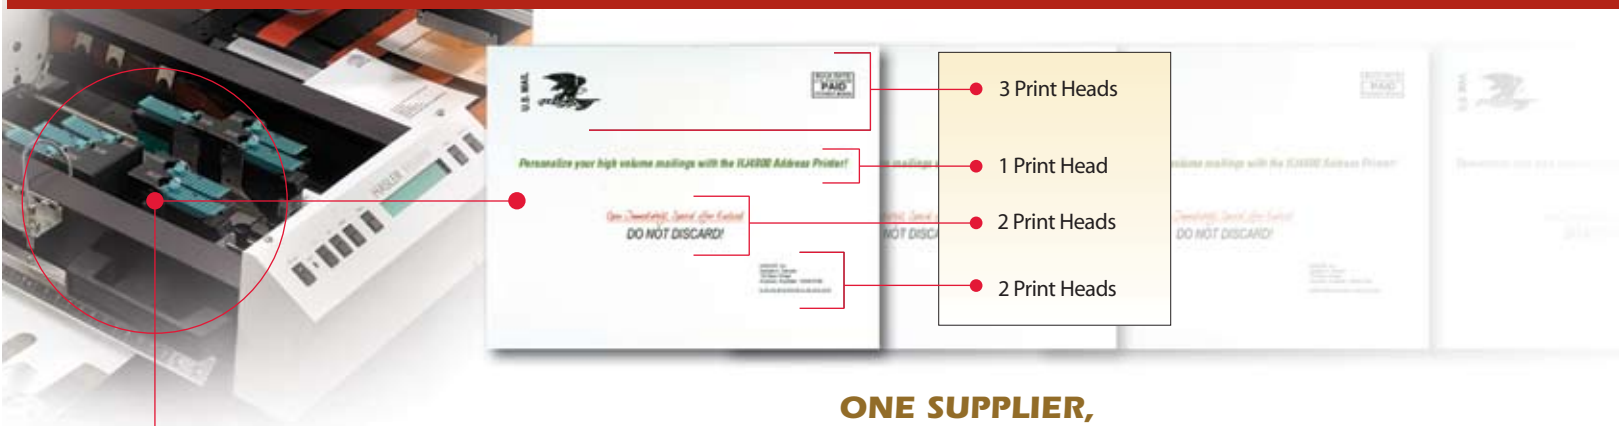

The HJPAS runs at speeds in excess of 30,000 pieces per hour, which means never having to slow down output. It offers versatile printing capabilities that don't limit your paper options, processing 20 lb. bond up to 1 1/4" thick. Proprietary or PCL software means complete system integration, printing from virtually any system and offering you the best option for your specific application. And the HJPAS's drying capabilities provide a large drying area that can dry virtually anything, with a convenient system timer for safe automatic shutoff.

## ONE SUPPLIER, NUMEROUS OPTIONS

The HJPAS is comprised of individual components that you personally select and integrate to create a complete production addressing solution. Whether you want to expand your mailing capabilities, upgrade components, or reduce the amount of time it takes to perform your addressing functions, the HJPAS enables you to configure a high-performance system that matches your requirements and your budget.

## THE HASLER ADVANTAGE

The HJPAS is easy to set up and simple to run, with the additional advantage of a single company providing your entire system. Hasler offers a complete range of component options and print units, all backed by the industry's leader in dealer commitment and customer support. Although many of these components are manufacturer interchangeable, the advantage of utilizing a complete Hasler system brings with it the quality assurance of Hasler products and the local sales and service support that continues to make Hasler the "better choice."
